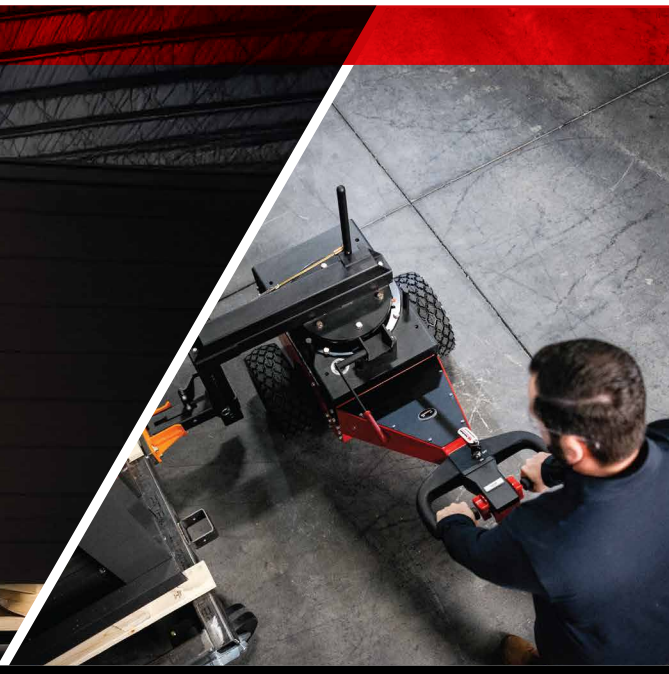
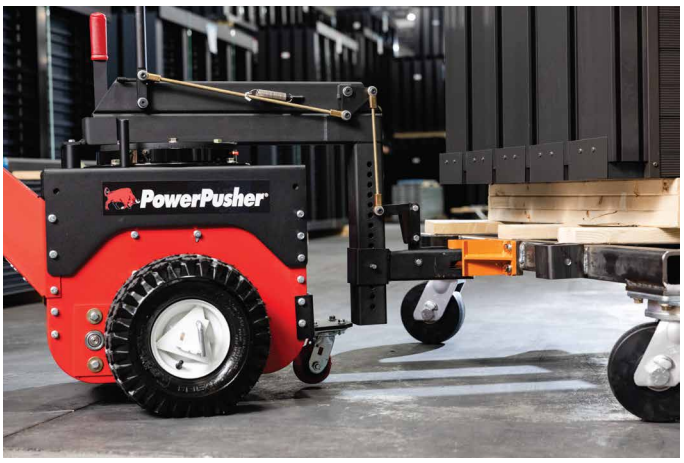
PowerPusher®
If It Rolls...We Can Move It.™



ExtraDuty PowerPusher®

Industrial-Strength Tug for Heavy Carts, Racks, and Rolls

Move heavy loads safely, efficiently, and with complete control. The Extra-Duty PowerPusher allows a single operator to move loads up to 21,000 lbs without forklifts, excessive manpower, or physical strain. Compact, battery-powered, and highly maneuverable, it's designed to improve safety and keep production moving.



Why Facilities Choose the Extra-Duty PowerPusher®?

Reduce Injuries and Operator Strain

Heavy loads can be moved safely by one person, reducing the risks associated with manual handling.

Improve Throughput

Move carts, racks, and equipment faster and more consistently with less downtime.

Free Up Forklifts

Handle routine movement tasks without tying up larger equipment or operators.

Built for Real Industrial Environments

Designed to perform reliably on plant floors, in tight aisles, and around equipment.

Common Loads Moved

Heavy Carts | Production Racks | Paper Rolls | Rail Equipment | Custom Industrial Loads

PowerPusher®
If It Rolls...We Can Move It.™

Designed for Control, Safety, and Reliability

High-Torque Electric Drive

Delivers consistent pushing and pulling power for demanding industrial applications.

Programmable Fingertip Controls

Adjust speed and response to the load and environment; fingertip operation reduces fatigue.

Stable Transaxle Drive System

Provides traction and control when maneuvering heavy loads.

Automatic Braking & Safety

Integrated braking and Emergency Belly Switch improve operator safety and control.

Battery-Powered Efficiency

Deep-cycle batteries and on-board charging provide reliable runtime and simple charging.

Machine Specifications

Specification	Details
Motor	24-Volt DC (200W or 400W options depending on capacity requirements)
Drive System	Chain and sprocket with reduction gearbox and differential
Controller	Fully programmable with diagnostic capability
Batteries	Two 12-Volt deep-cycle marine batteries
Battery Charger	On-board, 3-stage charging system
Push/Pull Capacity	Up to 21,000 lbs (depending on rolling resistance and application)

Options and Customization

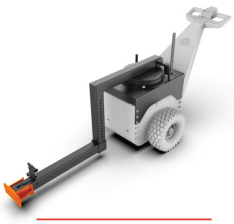
- Remote control operation
- Maintenance-free batteries
- Motion alert beeper and strobe light
- Multiple tire options
- Stainless steel configurations
- Fold-up handles for smaller footprint
- Standard and custom attachments available

Built Around Your Application

Every facility moves different loads in different ways. PowerPusher equipment can be configured with attachments, tires, and control settings to match your workflow and environment.

Available Attachments

Adjustable Height AutoLatch



Adjustable Height AutoLatch, Extended

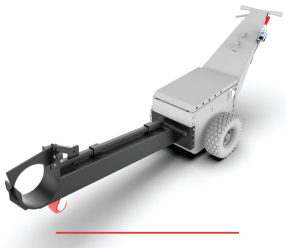
Push Pad

Adjustable Height Push Pad

Powered Raise Frame Grab

Gas Spring Attachment

Angle Iron Attachment



Railroad Axle Attachment

Paper Roll & Cable Reel Attachment
